VeriProof

For compliance and risk leaders who use Vanta

Bring your AI agents into your Vanta audits.

Auditors and your customers' security teams now ask how your AI agents are controlled. VeriProof checks each agent action against your rules and sends exceptions to the people accountable for them. Then it brings that evidence into Vanta, so the compliance program you already run extends to your agents and nobody has to piece the evidence together when an auditor asks.

WHAT EACH TEAM GETS

COMPLIANCE

Evidence for the Agentic Trust Controls

Records for 24 of the 65 controls in Vanta's open-source set for AI agents, from human oversight to runtime monitoring, plus summaries for ISO/IEC 42001, SOC 2, NIST AI RMF, HIPAA and the EU AI Act.

GOVERNANCE

Evidence your rules ran before each action

Show auditors what your rules decided, and who reviewed the exceptions.

AUDIT

Evidence an auditor can follow back

Start from what's in Vanta and trace it to the signed record behind it.

RISK

AI risk work tracked with everything else

Open remediation for your agents shows up in Vanta with an owner, and closes there when the work is done.

SECURITY

Access reviews that include VeriProof

Everyone who can sign in to VeriProof shows up in Vanta, ready for your next review.

veriproof.app/integrations/vanta

VeriProof

Evidence of how your agents are governed, where your audits already happen.

FROM VERIPROOF		INTO YOUR VANTA PROGRAM
Agent decisions and reviews	When you approve →	Evidence reports in the documents you choose
Remediation for your AI program	Every hour →	Remediation tasks with an owner
People with access to VeriProof	Every hour →	Accounts for your access reviews

Eight reports to choose from

Pick the ones your auditors ask for.

AI governance summary	Risk
Runtime safeguards and human review	Governance
Application and model inventory	Security
Exceptions and remediation	Risk
Framework evidence summaries	Compliance
Group assessments and application confirmations	Compliance
Evaluation history and assessment revisions	Audit
Audit evidence index	Audit

Your team stays in charge

Current between audits
Send the first report yourself. After that, updates can go on their own.

You set the scope
Choose which applications reports cover, and stop any report whenever you like.

Lands where Vanta expects it
Agentic Trust Controls evidence goes to the Vanta document request each control belongs to.

40%+

of agentic AI projects will be canceled by the end of 2027 over escalating costs, unclear business value, or inadequate risk controls.[1]

With AI evidence in your Vanta program, risk sign-off can keep pace with your agents.

Your first six months free

On an annual plan. Mention Vanta when you contact us.

Bring one agent, and we'll show you its evidence in Vanta.

Talk through your audit
